

Microsoft Clarity

Dss

To install Magento 2 Discount Limit extension:

Step 1: Unzip the file.

Step 2:

Create a new directory: app/code/Dss/MicrosoftClarity. MicrosoftClarity is the module's internal identifier which can be found in the "composer.json" file of the downloaded compressed file. (Please see node "psr-4").

Step 3:

Upload to root file of your Magento installation to have this directory rootfile/app/code/Dss/MicrosoftClarity. The Magento root directory contains directories such as "app", "bin", "lib" and more. All directories should match the existing directory structure.

Step 4:

Go to Magento 2 root directory. Enter command line:

```
php bin/magento setup:upgrade
```

```
php bin/magento setup:static-content:deploy
```

```
php bin/magento cache:flush
```

How it's Work?

General Configuration:

Go to **Stores → Configuration → DSS → Microsoft Clarity**

Scope: Default Config
Save Config

Yes
Toggle feature status

Enable Customer Group Tag
[store view]
Yes

Options

Tracking Code
[store view]

Paste the tracking code from your Microsoft Clarity account

- **Enabled:** Yes/No - Sets whether the module is enabled or disabled.
- **Tracking Code:** Please enter your Microsoft Clarity tracking code here.
- **Enable Customer Group Tag** - If this is enabled, custom tags and filters will be created based on the Customer Groups available in Magento in Microsoft Clarity. So, for each session and page that are tracked in Clarity, they will have a Customer Group tag, so it will be easier to filter and find session/recording for each page based on customer group.

How to get Microsoft Clarity Tracking Code?

Once you have created a new project in [Microsoft Clarity](#), from your Project Dashboard, select the Setup tab under the setting. In the Setup tab, you will find the **Clarity tracking code**, and below the script will be available.

We only need the tracking code to configure and enable Microsoft Clarity on your Magento website from the script.

Installation methods > Install manually

Copy and paste the Clarity code into the <head> element of your site or app.

```
<script type="text/javascript">
(function(c,l,a,r,i,t,y){
  c[a]=c[a]||function(){(c[a].q=c[a].q||[]).push(arguments)};
  t=l.createElement(t);t.async=1;t.src="https://www.clarity.ms/tag/"+i;
  y=l.getElementsByTagName(t)[0];y.parentNode.insertBefore(t,y);
})(window, document, "clarity", "script", "abcd123");
</script>
```

Copy to clipboard

Installed your code? It can take up to 2 hours to start seeing data.

How the module works:

Once you have added the Tracking Code, the Microsoft Clarity Script will start to appear on the front end of each page. You can view this in Page Source or your browser's developer tools.

```
<!doctype html>
<html lang="en">
  <head>
    <script>
      var BASE_URL = [REDACTED];
      var require = {
        'baseUrl': [REDACTED]
      };</script>
      <meta charset="utf-8"/>
      <meta name="title" content="Home Page"/>
      <meta name="robots" content="INDEX, FOLLOW"/>
      <meta name="viewport" content="width=device-width, initial-scale=1"/>
      <meta name="format-detection" content="telephone=no"/>
      <title>Home Page</title>
